

# ORACLE UX

Enhance productivity and eliminate training costs by redesigning your user interfaces according to the way you work.

Oracle UX is the simplified new interface for the Oracle Applications Cloud that ensures a consistent look and feel across different devices. It is designed for users who simply want to get on with their jobs, as well as for companies that want to avoid convoluted navigation and costly training.

Nsight's team of Oracle UX experts specializes in rebranding Oracle UX's simplified UI with your company logo and watermark and in restructuring and renaming pages based on the way you work.

Leveraging Oracle's CX360 solution, Nsight offers a compelling, efficient and effective means to join data from all customer-facing applications including data and events from connected devices to enhance existing business processes, making them more innovative and responsive.

## ORACLE UX FEATURES

### UI for different platforms

Oracle's simplified user interface ensures consistency of look and feel across different devices.

### Tailored user experience to the demands of the devices

By taking advantage of the built-in functionality in your devices, we can automate more tasks, creating designs with fewer steps and improving the user experience.

### Customized UX design patterns and page templates

You can choose your workflow from a library of UX design patterns, or developer building blocks, and similar page templates.

### Virtualized application in layers

Layering allows users to take care of a quick task, then move seamlessly back to the work at hand.

## ORACLE UX BENEFITS

### Expanded simplicity

Additional self-service, quick-action tasks that enable more people in your company to easily access the essential information and actions that support the way they work in the cloud.

### Expanded visualizations and analytics

Additional infographic-inspired, tablet-friendly, and interactive visualizations and embedded analytics appear throughout the UI.

### Expanded extensibility and customization

Rebrand the simplified UI with your company logo and watermark, and restructure and rename the available functional areas and pages.
