

Nsight assists largest electrical contractor company in USA in implementing the Oracle ADF based solution for user friendly and interactive UI interface for their business users

Background

The client is in the business of managing the largest electrical contractors and is leveraging innovative solutions to help the business meet their strategic goals. This project was to do a transition of their legacy 3rd party UI application to a robust and integrated UI solution using Oracle ADF platform

Client Pain Points

- The current solution was not scalable to meet the client needs. There was a critical need to use the Oracle Platform that is more integrated and scalable.
- High complexities involved in adding additional customizations to meet short term and long term business requirements.
- Using a 3rd party application, the TCO was high and did not integrate too well
- Licensing costs for 3rd party software was a redundant cost.

Solution Offered

-  Nsight's top-talented Oracle consultants leveraged the Oracle ADF , UX technology to rebuild the same "Control Center" Dashboard.
-  With expertise and knowledge in Oracle ADF, Nsight delivered an innovative solution to integrate their business process and Oracle Universal Content Management system to manage client's business content.
-  Nsight was involved in all phases of the project which included Business process and solution design, Solution development, testing, final activities for a successful go-live and post-production support.
-  With some new features for business users to meet their requirement of fast-track development with quality.
-  A POC was rolled out initially to showcase ADF capabilities and then a full-fledged solution implemented successfully.

Business Benefits

-  Cost-effective solution to overcome the revenue aspect.
-  Fast-paced Development to meet the customer business requirement and demand without compromising the quality of solution.
-  Provided new features along with the core solution.
-  Provided User-friendly and Interactive UI with Device compatibility (responsive UI), easy to use interface for their business users
