

SAP S/4HANA WITH NSIGHT: THE PROGRESSIVE ERP

SAP S/4HANA is the latest business suite that runs on the advanced SAP HANA in-memory database technology. Unlike legacy transactional ERP system, it empowers end users with real-time decision making. SAP S/4HANA streamlines processes, runs them in real-time and makes them resilient. The platform is built to become the digital core of the enterprise, supporting organizations on their digital transformation journey.

In short, SAP S/4HANA is an essential component for the new connected, digital world, guiding businesses towards innovative business models augmented by Big Data, AI & IoT and laying the foundation for new value propositions.

THE FLAGSHIP OF AN INTELLIGENT ENTERPRISE

Here is why you should consider embarking on the SAP S/4HANA journey:

If the future of your business is focused on enhanced customer experience

If you would like to use sophisticated technologies such as AI/ML, Big Data and IoT

If you want your businesses processes to provide real-time insights for decision making

If you want to enhance workforce productivity with an intuitive UI and mobility

THE PLATFORM THAT CONNECTS TO BUSINESS CHALLENGES AND OFFERS FASTER ROI

SAP S/4HANA is the digital core of your complete enterprise. It connects processes, offers in-depth insights, and integrates the business with the digital world comprehensively. SAP S/4HANA deal with some of the major business challenges that companies are facing today, by opening up a whole new array of limitless possibilities.

RAPID IMPLEMENTATION AND EMBEDDED ANALYTICS

The SAP S/4HANA suite embeds latest applications like Enhanced Warehouse Management (EWM), Global Trade Services (GTS), Transport Management (TM) and more. This ensures that the integrated processes can be up and running instantly, in a single system with minimal disruption. The embedded reporting empowers users to execute real-time analytics on transactional data.

BEING FULLY CONNECTED

The SAP S/4HANA business suite is a game changer by offering superior flexibility as it opens up to 3rd-party applications and external devices. It exemplifies a big step forward as the time needed to set up and configure new connections is lowered significantly. SAP S/4HANA combines conventional ERP data from Internet of Things (IoT) and SAP cloud applications for consumption in simulation models and accurate forecasts.

ACHIEVE SHORTER INNOVATION CYCLES

Using simple-to-comprehend and holistic data models, businesses can quickly respond and make faster adjustments to meet the continuously evolving environments. SAP S/4HANA also facilitates smarter use of infrastructure by eliminating the need to invest in multiple databases to run several applications, leveraging a unified functionality on a single platform.

SUPERIOR PRODUCTIVITY WITH ENHANCED UX

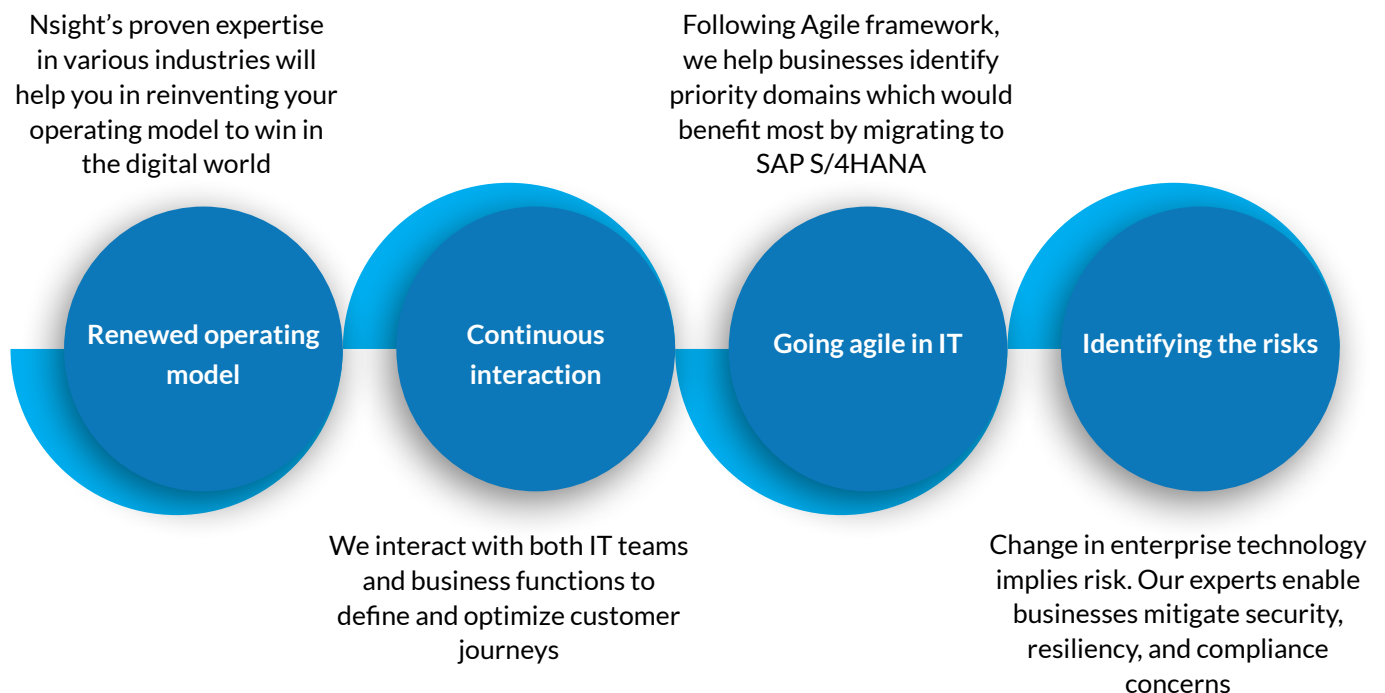

Whether it is an end user or a process owner, the new Fiori UX ensures more productivity by offering a simpler UI and giving users ability to access the systems from anywhere, anytime on any device. SAP S/4HANA offers Fiori launchpad, a role-based homepage with tiles that show status indicators, such as open tasks. It automatically pushes alerts to users and allows them to drill down to more comprehensive levels in order to take suitable actions.

WHY MAKE THIS LEAP WITH NSIGHT?

Whether it is the agility, the pace, the simplicity, or the cost efficiency of SAP S/4HANA that appeals the most, there is doubt that this new business suite delivers greater value and a lesser total cost of ownership. We put both, customer and user experience at the heart of next-generation Digital Transformation.

As a Certified SAP Partner, we have the expertise to help organizations make the most out of their investment. We help businesses to pave the way to achieve greater accomplishments by offering affordable and best-in-class SAP S/4HANA transformation solutions and reinvigorating their digitization journey.

As your long-term partner, we help you to define a realistic roadmap for your SAP S/4HANA migration, to ascertain how your business would benefit from an SAP S/4HANA solution, whether that should be deployed on the cloud on on-premises, and we support you through the complete migration process.

NSIGHT'S SAP PRACTICE

Whether it is consulting, implementation, migration, hosting, application management or support, our best-in-class technology solutions enable companies tackle their most ambitious projects and build new capabilities.

EXECUTING A FULL-SCALE DIGITAL TRANSFORMATION

A leading biotechnology company leverages SAP S/4HANA and SAP Ariba to enhance business growth and productivity.

CHALLENGE

The fast-growing business of the client was suffering due to its lack of a unified IT plan, absence of proper process controls, and lack of integrated connectivity between its various systems.

This was due to their dependency on multiple small, customized systems that were causing significant inefficiencies and high operational costs. They were still reliant on tedious manual processes using Excel sheets for processing complex daily business tasks.

The client's problem of having limited support resources resulted in long response times for issue resolution and enhance business functionalities.

Client

One of the prominent biotechnology company in the United States that manufactures synthetic DNA.

Network

Their synthetic DNA is used by companies in the medical, agricultural, industrial, and chemical industries to better lives and improve the sustainability of the planet.

SOLUTION

Nsight's Digital Transformation experts designed, developed, and implemented a fullscale digital transformation strategy for its client based on leveraging the capabilities of SAP S/4HANA and SAP Ariba.

Nsight was involved in all phases of the project, which included business process and solution design, including development, testing, implementation, and post-go live support.

- ✓ To improve business adoption and provide exceptional user experience, Nsight leveraged SAP Fiori to provide easy-to-use business apps that can be accessed anytime, on any device.
- ✓ SAP Activate combined the methodology, tools, and content for accelerating the system implementation.
- ✓ SAP Ariba Procure-to-Pay, augmented with Guided Buying, Supplier Enablement, and Spot Buy functionalities streamlined catalog maintenance, simplifying the entire procurement process.
- ✓ SAP Solution Manager streamlined project management activities and provided a central repository for solution documentation and test scripts.

BENEFITS

Nsight's successful implementation of SAP S/4HANA tightly integrated with SAP Ariba provided the client with a fully integrated, real-time enterprise resource planning system that gave them:

- » Improved day-to-day productivity
- » Streamlined transactions and invoice management
- » Better control and enhanced visibility across its business systems
- » Simplified, real-time analytics models
- » Significantly reduced manual processes and errors
- » Single source of truth enabled proactive decision making

ABOUT US

In today's digital age, we are the perfect partner you can count on as we recognize the digital and real-life challenges of your industry. We help you align your business in every step to give you the competitive advantage.

We support organizations of all sizes and deliver turnkey projects in crunch timelines. We discover, design, deliver, manage, and continuously enrich business solutions so our clients can meet their customer's changing requirements. We offer Managed Services Packages where we provide all services and support under one umbrella with our proven Global Delivery Model.

Our experts bring in deep industry experience and we understand the marketplace you are in, your industry and the technology that can solve your current pain points and future needs. And we bring together our proficiency with bespoke regional proximity, global competencies, and our trusted principles – constantly finding the right balance for each individual business.

By incorporating our best practices to ensure uncompromised quality and lower TCO with flexible engagement models, we have been successfully transforming businesses across the world.
