

END-TO-END DOCUMENT MANAGEMENT SYSTEM (DMS)

The largest electrical contractor reduces TCO and gains efficiency by leveraging Nsight's Oracle services to implement a Document Management Solution.

ABOUT THE CLIENT

The client is one of the most prominent private electrical contractors in the US.

NSIGHT ADVANTAGE

Vastly experienced in managing a wide variety of document storage challenges.

Implemented several DMS projects to store, share, and manage digital documents effectively.

Increased security for all documents with a robust document management system.

Certified Oracle partner with experience on different Oracle tools.

CHALLENGES

- There were huge storage, access management and document retention issues.
- Inability to recognize the document packets in PDF and other formats. There was a need to push data and documents into different categories.
- Resource intensive task to archive, retrieve and manage documents.

SOLUTION

- Nsight with expertise and knowledge on Oracle® WebCenter imaging, capture, and forms recognition technologies implemented an innovative middleware solution to process the PDF forms and load them to the Document Management System.
- A custom automated solution to reduce the cost and time involved in manual work.
- Custom document management system and workflow for end-to-end management of document packets.
- The team was involved in all project phases, including business process and design, solution development testing through a successful go-live, and post-production support.

BUSINESS BENEFITS

- Nsight's team built a cost-effective solution that saved resources to store and retrieve documents.
- A robust system that increased productivity and provided faster access to documents.
- Enhanced security for documents and better control over sensitive documents.
