# Internet of Things (IoT) Starter Package

Fast track your IoT enablement **to drive growth** and **uncover hidden opportunities**.

The Internet of Things (IoT) is revolutionizing the way enterprises do business. Jumpstart your digital transformation by availing of Nsight's IoT Starter Package to drive growth, uncover hidden opportunities, and fast track innovation.
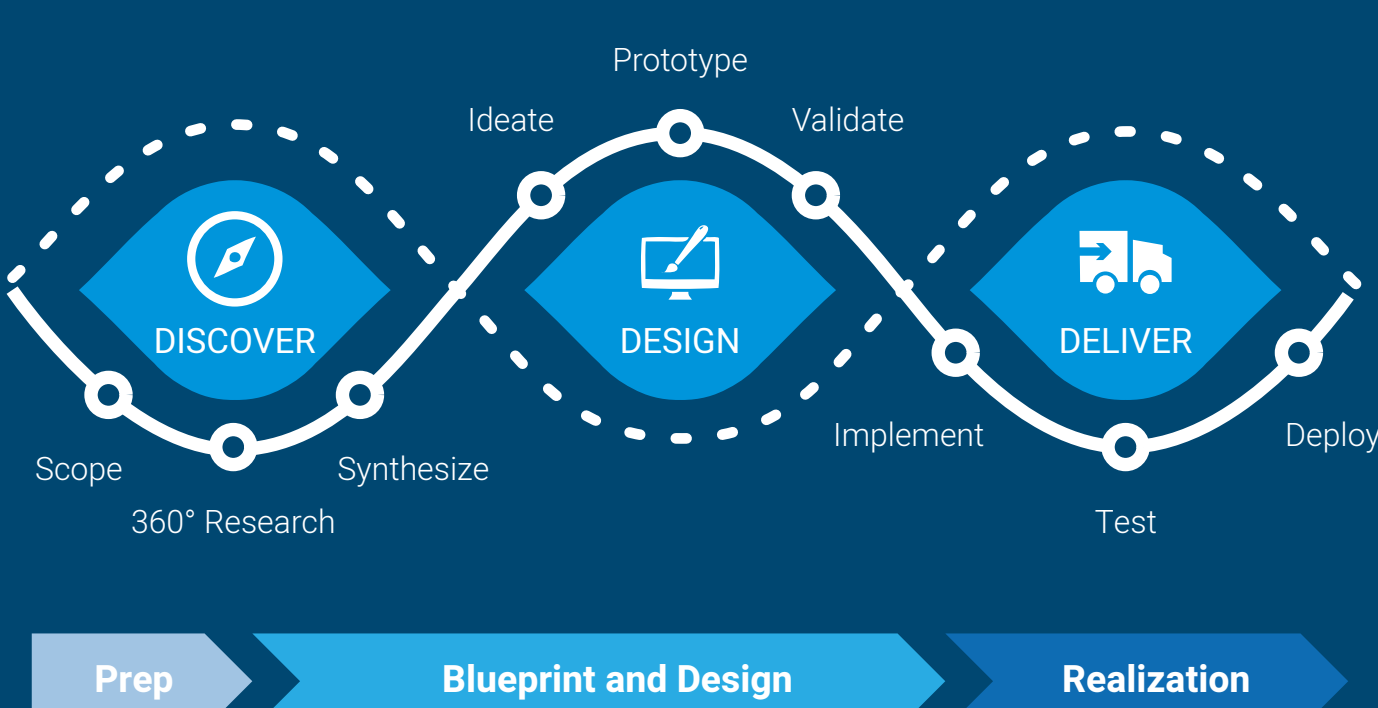

- Improve workplace safety and compliance
- Enable predictive services
- Improve product design and quality
- Improve customer service and experience including remote service
- Enhance asset utilization
- Improve data analytics and data integration
- Reduce operating costs
- Enable smarter business operations and decisions

What You Get with the Package

Smart Devices
(s/w, h/w, sensors, Mobile app)

IoT demo/POC
(End to end implementation)

Implementation Strategy
(End to end implementation plan)

IoT Platform
(Scalable, Real-time, Secure)

Application/UI
(Mobile, Web, Enterprise)

Adoption Assessment
(Business use case study)

Scope and Deliverables

- Identify POC scope for business case
- Functional and business readiness assessment
- Implementation path for IoT adoption to leverage business benefits
- Detailed project implementation plan
- Activate and configure cloud environment, end devices & software/programs for sensors and actuators
- Assist hardware purchase and configuration as per business need
- Activate and configure data visualization setup on cloud
- Post-installation activities
  - Configure device authentication and security
  - Scaling capability and support
  - Testing
  - Functional and technical documentation
- Knowledge sharing and user training
