# ORACLE SOA
## Simplify IT with Nsight's Unified Solution

Enterprises leverage new technology trends and innovations in order to remain competitive. However, this strategy can result in a hodgepodge of technologies that is difficult and costly to manage. There is also an urgent need to integrate with the Cloud, mobile-enable existing applications, and connect IOT devices to existing infrastructure.

Oracle SOA Suite is a key enabler for simplifying IT through Cloud integration, application integration, B2B, mobile enablement, IOT, and fast data.

Mobile   IOT   Cloud

Oracle SOA

Mobile   SOA Governance and API Mangement   Cloud

IOT

| Analytics | Business Activity Monitoring | Event Processing |
|---|---|---|
| Orchestration | BPEL Process Manger | Business Rules |
| Service Virtualization & Meditation | Service Bus | |
| Connectivity | CloudO | n-Premises | Business to Business |

**ORACLE SOA SUITE 12c**

## SOA SUITE 12c KEY BENEFITS

- Efficient management of business and technology change
- End-to-end solution monitoring with root-cause analysis
- Reduced time to market
- Reduced integration cost and complexity
- Increased visibility
- High availability
- Scalability

## The Nsight Advantage

Nsight can help your organization deploy Oracle Applications by providing highly specialized skills and knowledge to augment your existing team in a specific area of a project or by taking complete ownership of the development and implementation of the solution.

Our core team of consultants has more than 10 years of IT experience in providing functional, technical and project management expertise in Oracle Applications. We can help you through all the phases of Oracle Applications deployment right from business process re-engineering to implementation and post-implementation support.
