ORACLE EXADATA
Scale-up Data Warehouse Performance with Oracle Exadata

Oracle Exadata is software and hardware engineered together to provide the highest-performing and most-available platform for running Oracle Database. The database servers, storage servers and network are pre-configured, pre-tuned and pre-tested by Oracle experts, eliminating weeks or months of effort typically required to deploy a high performance system. This all-in-one box package replaces traditional databases and related infrastructure.

Exadata runs all types of database workloads including Online Transaction Processing (OLTP), Data Warehousing (DW), In-Memory Analytics and consolidation of mixed workloads.

Nsight can help organizations stay ahead of the competition by leveraging the Oracle Exadata platform to simplify deployment and maintenance of any combination of database requirements. Equipped with a keen insight into Oracle Exadata, we can provide the following benefits:

- Replace and consolidate isolated special-purpose databases into one platform
- Run more queries concurrently for faster access to business-critical information
- Shorter deployment
- Provide a trusted, highly-available and cost-effective platform
- Systematic and automated database monitoring and quality service

ORACLE EXADATA

FEATURES

- Dedicated storage
- InfiniBand interconnects
- Smart scan
- Elastic configurations
- Smart flash cache
- Hybrid columnar compression
- Large system memory capacity

The Nsight Advantage

Nsight can help your organization deploy Oracle Applications by providing highly specialized skills and knowledge to augment your existing team in a specific area of a project or by taking complete ownership of the development and implementation of the solution.

Our core team of consultants has more than 10 years of IT experience in providing functional, technical and project management expertise in Oracle Applications. We can help you through all the phases of Oracle Applications deployment right from business process re-engineering to implementation and post-implementation support.
