Nsight

Move to the Cloud with Nsight's AWS Migration Services

Nsight's Amazon Web Services (AWS) Center of Excellence (CoE) gives you access to the tools, processes, and expertise you need to make your cloud migration as hassle-free as possible.

Why move to Amazon and IAAS?

Shift CAPEX to OPEX

Speed and Agility (IDC says 5x faster)

Lower Costs (IDC say 70% Lower TCO)

Avoid non-differentiated heavy lifting

Enhanced flexibility

Go global in minutes

We Plan

- Application analysis, TCO & Business case, and prioritization for AWS deployments

- Solution design and future state architecture including hybrid configurations

- Migration strategy and execution plan

We Build

- Automated deployment of multi-region scalable AWS environments

- Deploy security controls and establish governance model

- Testing and performance optimization

We Run

- Ongoing performance monitoring and cost optimization

- Managed services metrics and support model implementation

- Decommissioning of legacy environment support as needed

Nsight can help you migrate to applications in the Cloud:

- SAP ERP, HANA, and Analytics
- Oracle E-Business Applications
- Legacy Systems Migrations
- Home-grown Applications

Why Nsight ?

Nsight is a system integrator with deep expertise and competency in delivering cloud solutions (mid-premises vs.cloud).

Nsight experts are well versed with AWS Cloud Integration. Our trained and certified technicians have migrated our demo solutions (SAP ERP/CRM and Oracle E-business). They are deeply knowledgeable about how to integrate these systems with on-premises applications.

Nsight team has integrated CRM Cloud (Salesforce and Oracle Cloud) into multiple software systems. These integrations have been performed using third-party software and custom code written in Microsoft .NET and Java.

Our experts have worked on all types of CRM data integration and cloud integration applications.
