Top 10 Indicators to Drop QuickBooks

66% of surveyed organizations

using QuickBooks had challenges with an inability to handle complex accounting needs.

If you experience one or more challenges with QuickBooks, it's time to transition to a better ERP.

Limited by Spreadsheets

QuickBooks offers limited access to the system with a heavy dependency on spreadsheets (prone to more errors).

Resource-Intensive

Since QuickBooks cannot manage multiple entities, consolidation is a resource-intensive task.

Complex Workaround

QuickBooks does not offer customization to suit unique business requirements. Businesses are compelled to find complex workarounds for simple solutions.

Limited Reporting Capabilities

Disparate data storage in different spreadsheets (which may not have updated data) limits reporting capabilities.

Storage Limitations as Need Grow

The performance of QuickBooks worsens as business users and company file sizes increase.

Incompatible with Other Systems

QuickBooks does not offer easy integration with third-party solutions creating data syncing issues and gaps where enterprises need flexibility.

Lacks Sales Forecasting and Budgeting Capability

QuickBooks has a limited trend analysis capability due to its inability to maintain historical data.

Inflexible to Business Changes

Every time there are business changes, it's complicated to make changes in matrix SKUs and add new sales tax rates.

Cumbersome Audits

Compliance needs and regulations are constantly evolving. It is time-consuming to consolidate and prepare for audits with QuickBooks.

Burdensome Month-End Closure

At the end of every month, it is tedious to consolidate data from disparate spreadsheets across different departments into QuickBooks.
