

LIFE SCIENCES | ERP MODERNIZATION

FROM A 30-DAY REPORTING LAG TO **REAL-TIME SPEND ANALYSIS**

How a life sciences leader unified **NetSuite** and **Coupa** to gain on-demand visibility across entities - accelerating close cycles, strengthening working capital control, and enabling decision-ready intelligence.

ORACLE®
NETSUITE

THE TRANSFORMATION

A fast-growing U.S. biotech organization needed to bring finance, procurement and operational processes together across a multi-subsidiary environment. As complexity grew, fragmented workflows and delayed reporting were limiting visibility into spend, cash flow and business performance.

CHALLENGE

REPORTING LATENCY

A 30-day reporting lag slowed access to critical financial insights and delayed decision-making.

MULTI-ENTITY COMPLEXITY

Multiple subsidiaries and currencies created complexity across financial consolidation and reporting.

PROCUREMENT DISCONNECTS

Siloed procurement and ERP workflows limited visibility into spend, purchasing and cash flow.

MANUAL DATA DEPENDENCY

Fragmented KPIs and reporting processes increased operational effort and constrained timely analysis.

SOLUTION

UNIFIED ERP OPERATIONS

Established a scalable NetSuite foundation across multi-entity, multi-currency financial operations.

CONNECTED PROCUREMENT

Integrated Coupa with NetSuite to strengthen spend visibility and connect procurement with downstream financial processes.

DECISION-READY INTELLIGENCE

Introduced custom KPIs, dashboards and reporting to surface critical business insights on demand.

INTEGRATED DATA & PROCESSES

Connected financial, sales, expense and operational workflows to create a more cohesive enterprise operating model.

BUSINESS OUTCOMES

Bridging clinical innovation and financial control

SPEND GOVERNANCE

CONNECTED CONTROL

Integrated Coupa and NetSuite workflows to improve visibility across **procurement, purchasing and payment processes**, strengthening spend governance from requisition through financial reporting.

CAPITAL AGILITY

ACCELERATED VISIBILITY

Eliminated the **30-day reporting lag**, providing on-demand visibility into financial performance, cash flow and working capital across operating subsidiaries.

OPERATIONAL VELOCITY

REDUCED ADMINISTRATIVE DRAG

Automated reporting and core financial workflows, reducing manual effort and giving finance teams **faster access to decision-ready information**.

SCALABILITY

AMULTI-ENTITY READINESS

Established a unified cloud ERP foundation supporting **multi-subsidiary, multi-currency operations** with greater consistency, control and scalability.

Tighter spend control. Faster financial visibility. A scalable foundation for growth.

THE NSIGHT ADVANTAGE

BEYOND STANDARD ERP IMPLEMENTATIONS

Proven Integration Authority

Deep technical capability in orchestrating complex, multi-vendor enterprise ecosystems into unified operational environments.

Outcome-Led Delivery

Architectural design driven strictly by business metrics, focusing on decision velocity, capital control, and risk reduction.

Multi-Entity Mastery

Built for complex corporate structures, effortlessly resolving multi-currency, intercompany, and tax compliance friction.

Single-Partner Accountability

End-to-end responsibility across strategy, middleware engineering, process automation, and long-term hypercare.
