THE CATALYST

CHALLENGE

As operational footprint expanded past 7,500+ locations, legacy architecture introduced significant operational drag into the quarterly close.

MANUAL CLOSE CYCLES:

Severe reporting delays caused by manual data compilation across disparate entities.

FRAGMENTED ERP SYSTEMS:

Disconnected legacy systems limited visibility across entities and business functions.

DATA INTEGRITY GAPS:

Absence of enterprise governance creating audit risks and hindering strategic decision-making.

SOLUTION

Working alongside Nsight, the client co-engineered a unified financial core, establishing a single source of truth and governed framework:

ORACLE CLOUD FCCS

Streamlined financial consolidation, automated eliminations, and accelerated close cycles.

ORACLE CLOUD NRCS:

Automated narrative reporting packages delivering consistent, leadership-ready insights.

ORACLE CLOUD EDMCS:

Centralized master data management and hierarchy governance across all entities.
